Press Release

Model 1360 Loose Loop Print & Apply Labeler

The LSI Model 1360 Loose Loop Print & Apply labeler is designed to apply thermal transfer, direct thermal or pre-printed labels at rates up to 120 products per minute. It can utilize almost any table top printer to provide the throughput, resolution and media range desired. This labeling head uses a stepper motor drive system which eliminates such wear items as a clutch and brake. This unit can accommodate up to a 4" X 4" label with print resolution to 300 DPI. It is capable of printing human readable text, bar codes and graphics.
